<b>Problem</b> Problem had been noticed with most recent version of OODCE when performing security ACLs. The IsAuthorized method was inconsistent and frequently dumped core.				
<b>Proposed Solution</b> HP has provided a fix to the SecId library for security ACLs in OODCE. This library needs to be archived into the existing liboodce.a to fix the problem. This should be centrally mounted in the development area as well as the mini DAAC. Existing applications need to be relinked with the new oodce library.
